

KEVIN GARRIDO

Intelligent Computing Engineer | Full-Stack & DevOps

Aguascalientes, México | (+52) 449-166-6954 | kevingarrido711@gmail.com | linkedin.com/in/kdgs7 | github.com/k3v-5 | kevingarrido.dev

Intelligent Computing Engineer specializing in Full-Stack architecture (.NET Core, Angular, SQL Server) and DevOps automation (CI/CD, Docker, Linux). Designs and deploys high-availability enterprise applications, orchestrating CI/CD pipelines to accelerate production delivery cycles. Pioneer in integrating AI agents and developer workflows via Model Context Protocol (MCP) to minimize compute overhead and boost technical throughput.

PROFESSIONAL EXPERIENCE

RAINDE

November 2024 – Present

Software & DevOps Engineer

Aguascalientes, MX

- Architected and deployed responsive enterprise applications (web & mobile) using Angular, TypeScript, .NET Core, and SQL Server for mission-critical logistics operations.
- Engineered and automated CI/CD release pipelines (GitHub Actions / GitLab CI) for compilation, packaging, and distribution, slashing release turnaround from hours to under 15 minutes.
- Built scalable RESTful services and implemented Business Intelligence pipelines (Power BI / Tableau) driving operational traceability across logistics workflows.
- Standardized Git branching workflows (GitFlow) and reproducible environment provisioning using Docker and Linux, eliminating configuration drift across development stages.

Lion Intel Solutions

May 2024 – November 2024

Fullstack Developer

Aguascalientes, MX

- Spearheaded end-to-end architecture and implementation of a clinical dermatology web portal utilizing Vue.js, ASP.NET, and SQL Server.
- Engineered secure RESTful APIs and marketplace integrations to synchronize digital catalogs and e-commerce orders in real time.
- Optimized relational SQL queries and administrative workflows, cutting response latency by 35% and centralizing patient operational management.

Universidad Cuauhtémoc

May 2021 – February 2023

IT Infrastructure & Automation Engineer

Aguascalientes, MX

- Engineered and deployed a custom internal ticketing platform, automating service reporting and cutting incident resolution times by 40% for 1,000+ campus users.
- Administered campus network infrastructure, telecom servers, and security hardware, maintaining 99.5% operational uptime and reliability.

TECHNICAL PROJECTS & ENGINES

Real-Time Full-Stack Dating Platform

ASP.NET Core Web API, Angular, SQL Server, SignalR / WebSockets, JWT, EF Core

- Architected a decoupled client-server architecture featuring secure JWT authentication and granular user session management.
- Engineered real-time bidirectional messaging via SignalR/WebSockets and optimized relational schemas with EF Core for high-concurrency throughput.

Enterprise CI/CD & Multi-Platform Deployment Pipeline

GitHub Actions, GitLab CI, Docker, Docker Compose, Linux (Ubuntu), Bash, Nginx

- Automated complete end-to-end compilation, test validation, and artifact packaging via GitHub Actions for web and mobile distributions.
- Containerized application services using Docker and configured Nginx reverse proxies on Linux servers, cutting deployment times by 65% while eliminating manual failures.

Blender Asset Orchestration Engine (MCP & AI Agents)

Python API, Model Context Protocol (MCP), Procedural 3D, Headless Blender

- Architected a generative orchestration pipeline via Model Context Protocol (MCP), bridging AI coding agents with Blender for procedural 3D synthesis and automated rigging.
- Slashed LLM context token consumption by up to 80% using compact batch control signals and automating a 19-stage headless rendering pipeline.

EDUCATION

Autonomous University of Aguascalientes

August 2019 – June 2024

B.S. Intelligent Computing Engineering

Aguascalientes, MX

Focus: Artificial Intelligence, Intelligent Optimization, Data Mining, and Advanced Algorithms.

TECHNICAL SKILLS

Full-Stack & Backend Architecture:

DevOps, CI/CD & Cloud Infrastructure:

Intelligent Systems, MCP & Generative AI:

Business Intelligence & Analytics:

Languages & Achievements:
