

KEVIN GARRIDO

Software & DevOps Engineer | Infrastructure & Releases

Aguascalientes, México | (+52) 449-166-6954 | kevingarrido711@gmail.com | linkedin.com/in/kdgs7 | github.com/k3v-5 | kevingarrido.dev

Software Engineer with a strong focus on DevOps, build automation, and multi-platform release pipelines (web and mobile). Solid background in Git workflow standardization, environment provisioning, Docker, Linux, and production REST API architectures.

PROFESSIONAL EXPERIENCE

RAINDE November 2024 – Present
Software & DevOps Engineer Aguascalientes, MX

- Architected and deployed responsive enterprise web and mobile applications using Angular, TypeScript, .NET, and SQL Server.
- Orchestrated compilation, packaging, and CI/CD release pipelines for multi-platform web and mobile production distributions.
- Engineered scalable RESTful APIs and Business Intelligence reporting services for the logistics operations sector.
- Standardized Git branching workflows, environment provisioning, and automated build stability across cross-functional teams.

Lion Intel Solutions May 2024 – November 2024
Fullstack Developer Aguascalientes, MX

- Led end-to-end full-stack development of a medical portal for a dermatology center using Vue.js, ASP.NET, and relational databases.
- Engineered secure RESTful endpoints and integrated marketplace APIs to synchronize product catalogs and digital sales in real time.
- Streamlined administrative and operational workflows, cutting operational processing times and centralizing customer management.

Universidad Cuauhtémoc May 2021 – February 2023
IT Infrastructure & Automation Aguascalientes, MX

- Automated internal administrative service reporting by engineering a custom request and incident management platform.
- Supervised campus IT infrastructure, hardware maintenance, network reliability, and security camera network deployments.

TECHNICAL PROJECTS & ENGINES

Multi-Platform CI/CD & Deployment Pipeline Docker, GitHub Actions, Linux / Bash, Nginx, Mobile App Releases

- Automated compilation, versioning, and distribution pipelines for mobile and web releases, eliminating manual deployment errors.
- Containerized application services using Docker with Nginx reverse proxies for reproducible and resilient production deployments.

Full-Stack Dating Platform ASP.NET Core Web API, Angular, SQL Server, SignalR, JWT

- Engineered a decoupled client-server architecture with secure JWT token authentication and user profile management.
- Implemented real-time bidirectional messaging with SignalR and optimized relational persistence using Entity Framework Core.

Blender Asset Orchestration Engine (AOE) Python API, Model Context Protocol (MCP), Procedural 3D, Headless Blender

- Engineered a generative orchestration pipeline bridging LLMs via MCP to synthesize 3D procedural meshes and automated rigging.
- Reduced context token overhead by up to 80% via single-turn batch payloads and automated 19-stage headless Blender export.

EDUCATION

Autonomous University of Aguascalientes August 2019 – June 2024
B.S. Intelligent Computing Engineering Aguascalientes, MX

Focus: Artificial Intelligence, Intelligent Optimization, Data Mining, and Advanced Algorithms.

TECHNICAL SKILLS

DevOps & Infrastructure:

Full-Stack Architecture:

Creative Tech & Languages:

AI & Intelligent Systems:
